Case-level qualitative result — synthetic case 004

A

Ground-truth partition
E_b = 2.81 kPa, ρ_E = 1.30

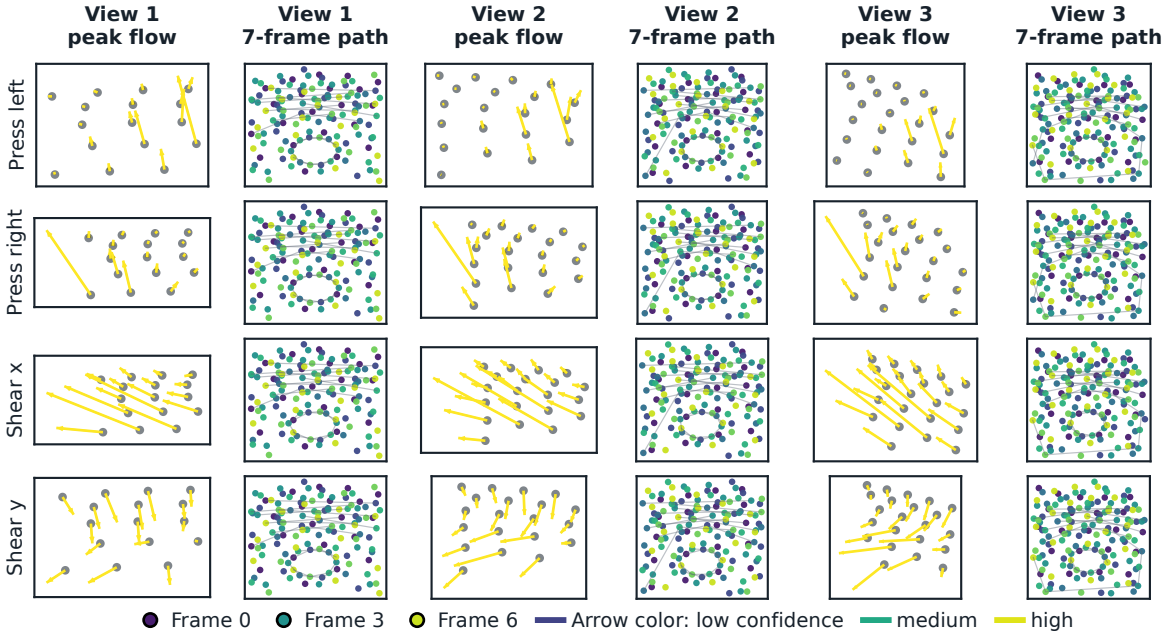

Predicted partition
E_b = 2.69 kPa, ρ_E = 1.44

Rest → peak-deformed surface (gray → orange; displacement ×4)

Frozen FEM screening decision — screening rejected: true; relative cost reduction: 2.95%
7 evaluations; retained PCA–Ridge initial estimate

B

C
