Case-level qualitative result — synthetic example, lung_patient_004

A

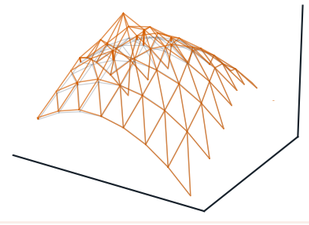

Ground-truth partition
E_b=2.81 kPa, r=1.30

Predicted partition
E_b=2.69 kPa, r=1.44

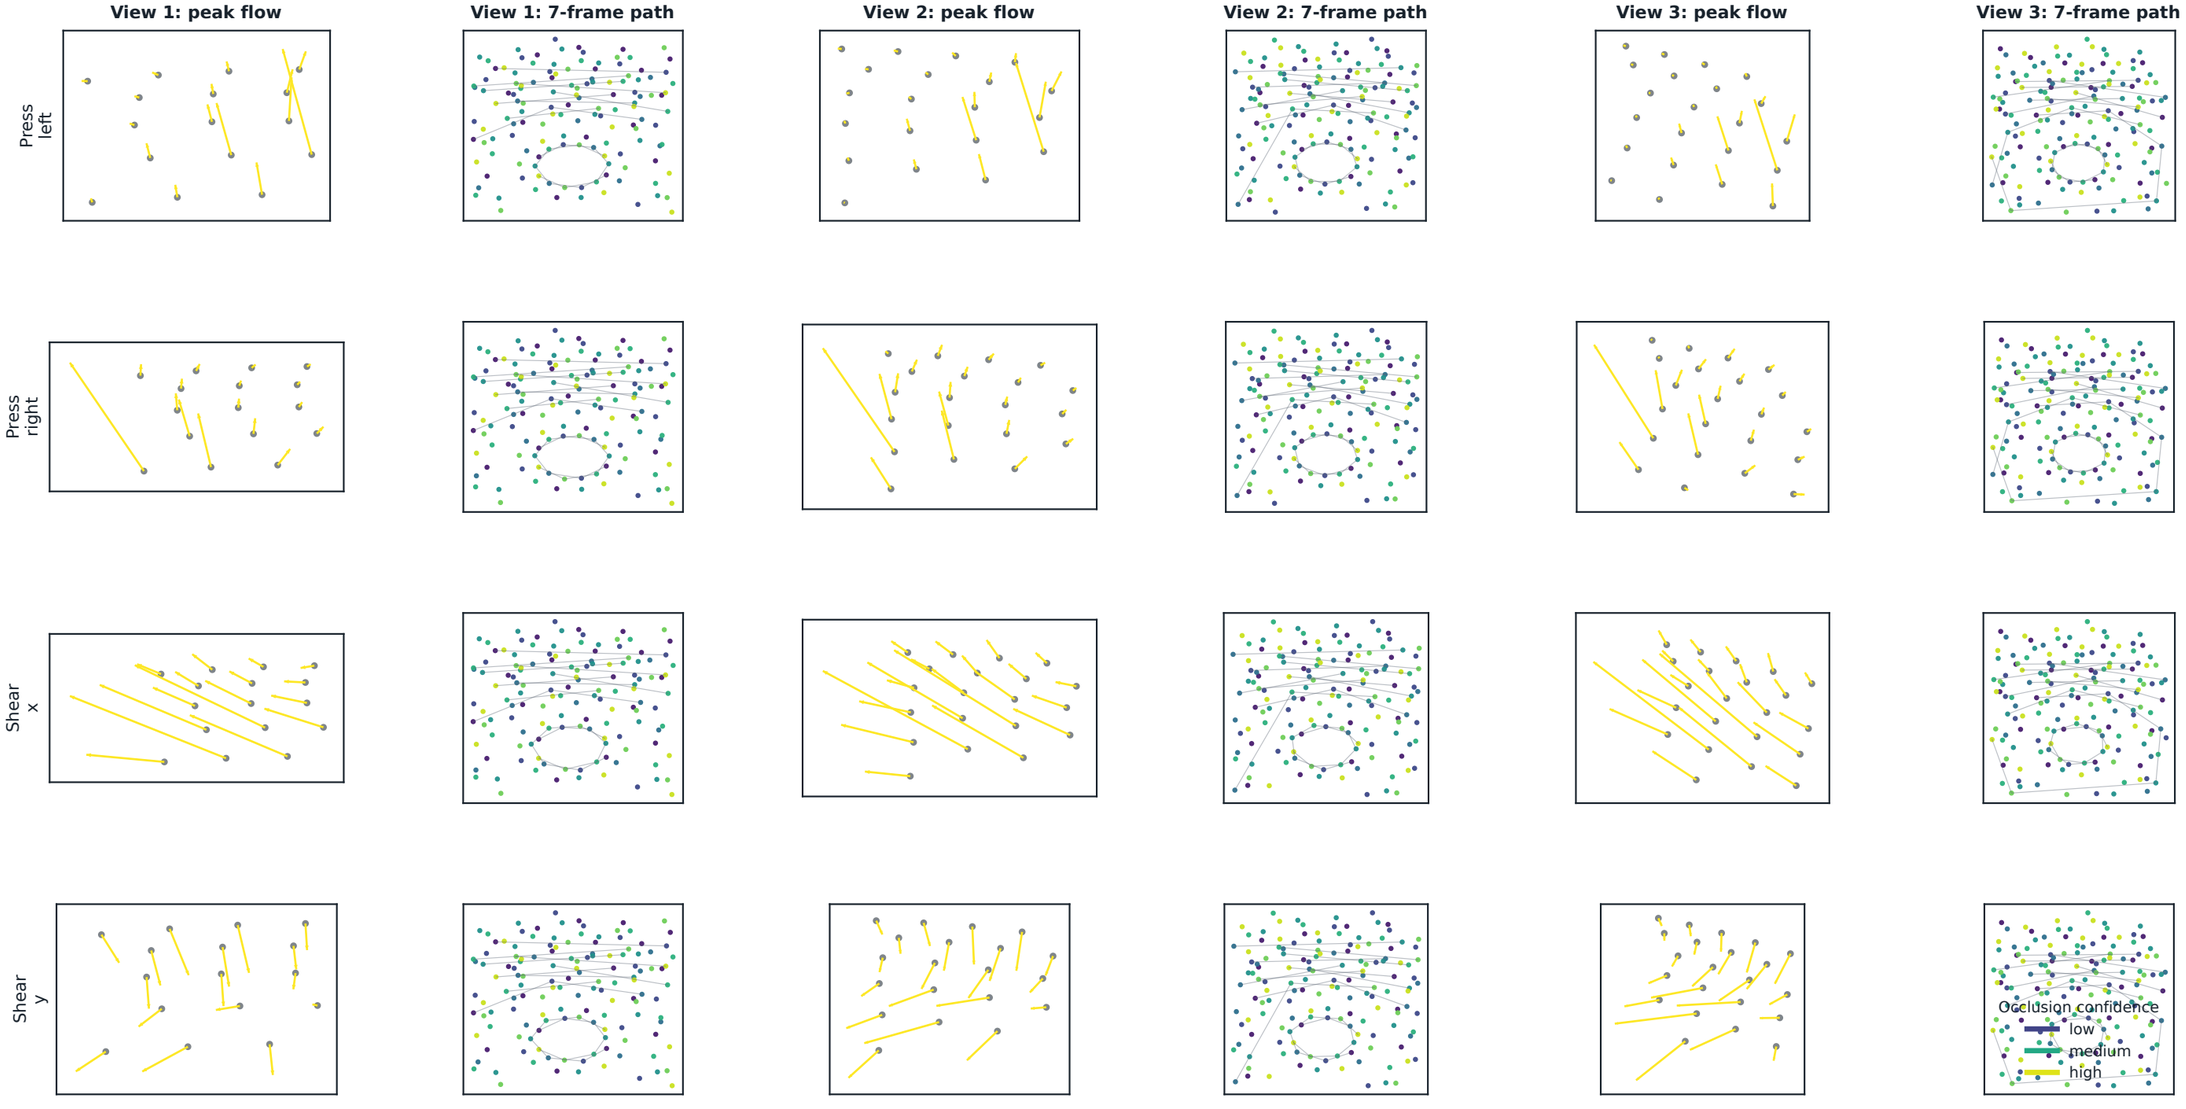

Rest → peak-deformed surface
(gray → orange; displacement ×4)

Frozen FEM screening decision
screening rejected: true • relative reduction: 2.95%
7 evaluations • retained PCA–Ridge initial estimate

B

C
