# Real ION CT-derived geometry assessment: numerical feasibility only

**A**

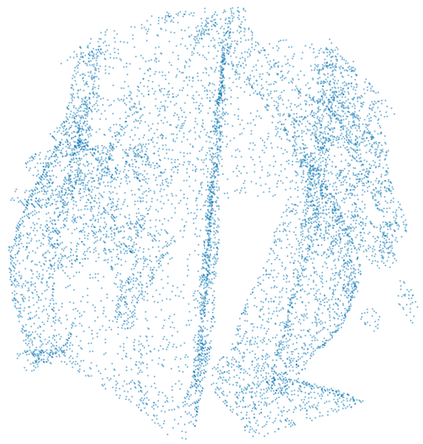

## De-identified ION CT geometry 1

```
Exported patient-derived surface vertices 538,977
Surface faces        1,078,230
Degenerate faces     0
FEM nodes / tets      256 / 882
Min. rest Jacobian    0.405
Min. deform. Jacobian 1.000000
Finite model output   yes
Motion residual       not available
```

**B**

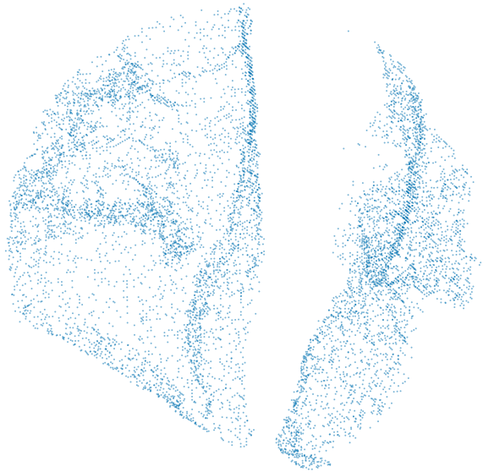

## De-identified ION CT geometry 2

```
Exported patient-derived surface vertices 1,220,408
Surface faces        2,440,916
Degenerate faces     0
FEM nodes / tets      256 / 882
Min. rest Jacobian    0.405
Min. deform. Jacobian 1.000000
Finite model output   yes
Motion residual       not available
```

**C**

## De-identified ION CT geometry 3

```
Exported patient-derived surface vertices 715,271
Surface faces        1,433,722
Degenerate faces     0
FEM nodes / tets      256 / 882
Min. rest Jacobian    0.407
Min. deform. Jacobian 1.000000
Finite model output   yes
Motion residual       not available
```
